

Cloud Connector

imageRUNNER ADVANCE DX

CLOUD CONNECTOR

A Convenient Connection
in the Cloud

Connecting Canon MFD to cloud services for seamless print and scan capabilities.

Connecting to cloud services in the workplace is often a major contributor to overall efficiency. Cloud Connector from Canon is an easy-to-use application that connects imageRUNNER ADVANCE DX and supported imagePRESS models¹ with selected cloud services^{2,3} allowing users to expand their print and scan capabilities without the need for additional backend system configuration. This convenient solution includes simple set up and activation steps, and an uncomplicated, do-it-yourself user registration process.

There are Cloud Connector options that enable users to easily:

Scan and upload
directly to cloud storage

Print from the cloud
at the device

Scan to email without
admin set up

Print from email without
use of print drivers

Canon

Connect Your Canon MFD to Selected Cloud Services with Cloud Connector

Note: One 3-year, 4-year or 5-year term license required per destination per device. Each term license sold separately and expire at the end of the respective term.

Cloud Connector Supports Users with an Independent Installation and Configuration Process

Once activated, users can single-handedly register for Cloud Connector without additional assistance from a Systems Engineer or Administrator.

Register an Individual Email Address

Establish a Connection with the Cloud

NO User Management
NO Tenant Settings Required

NO Settings for Email Linkage

Getting Started with Cloud Connector

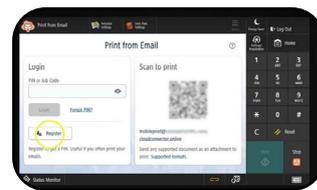

1 ENABLE CLOUD CONNECTOR

- Enable Cloud Connector by entering the license access number in the operation panel
- The number will need to be entered for each destination

2 REGISTER USER

- Press the [Register] button on the operation panel to enter/register an e-mail address

3 RECEIVE A PIN

- Receive a PIN code by email
All connectors can be used with a single PIN

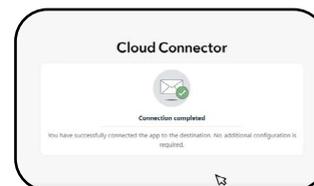

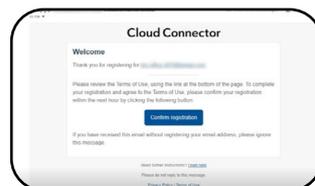

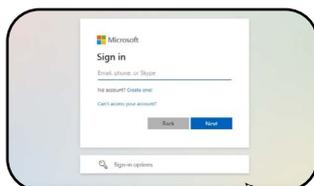

4 CONNECTION OPERATION

- Select the application of the destination in the operation panel
- Press [Send instructions via email]
Connection operation is possible by scanning QR code with a mobile device (see step 5)

5 AUTHENTICATION

- Open the received email and press [Connect]
- Authentication screen opens in browser to then enter your credentials
