
GET THE DATA YOU NEED TO SUCCEED WITH EFORMS

IT ALL COMES
TOGETHER

Canon eForms solutions replace paper-based forms to gather more accurate information from employees, contractors, suppliers and vendors, helping you save time, streamline approvals and increase productivity.

BETTER RESULTS START WITH BETTER DATA CAPTURE

Paper-based processes may be common in the construction industry, but can contribute to inefficiency and poor productivity. Canon eForms solutions help you capture accurate information and cut down on time-consuming administration, costly project delays and counterproductive double-handling.

Design and deploy custom forms

You don't need to be a qualified coder to create an eForm. The drag-and-drop What You See Is What You Get designer is highly user-friendly, which means quick builds and fast deployment.

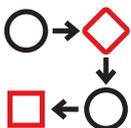

Strengthen your data capture

The days of deciphering illegible handwriting are over. When a user submits an eForm, you can be sure the information will be more accurate, concise and organised. With eForms there is no need for any special PDF software; all you need is a web browser.

Integrate for efficiency

eForms are one part of Therefore™, our cloud-based Document Management System that allows you to securely capture, store and track information within your existing systems. Therefore™ integrates directly into existing SAP®, Microsoft® Sharepoint® and many Windows® and web-based applications using REST APIs or other data transfers, smoothly sending captured data to the system/application where it is needed.

Streamline document workflow

Data captured by eForms feeds seamlessly into a digital workflow. You can be sure the data will be automatically routed to the right department.

Use any device

Requiring only a web browser and Internet access, eForms can be viewed, completed and submitted anywhere, anytime. That means fewer clipboards and better data capture.

ONE SOLUTION, SO MANY APPLICATIONS

eForms can be used to support a range of different business functions, from project approvals to staff training.

- ✓ Approvals
- ✓ Audit
- ✓ Certifications
- ✓ Compliance
- ✓ Feedback
- ✓ Inductions
- ✓ OH&S incidents
- ✓ Site visits
- ✓ Training

and much more.
