The CANON PRODUCTIVITY AND COST CONTROL PACK will help you reduce costs and increase productivity.

As a small business you have challenges like ever increasing operating costs and the need to ensure that your employees are productive and focused on income-generating work. Canon understands these challenges and has just the right solution for you.

The Canon Productivity and Cost Control Pack will help you reduce costs and increase productivity. Let the latest Canon technology sharpen and streamline your workflow processes, reducing overall costs and enhancing your team's productivity.

Does your business face these productivity and cost challenges?

“In your office environment, leverage the buyer’s market to your advantage by upgrading to more effective smart MFPs that reduce costs, improve productivity and enhance business processes.”

Get the best of both worlds with a solution tailored specifically for your business.

- All your various individual devices like, printer, scanner and fax are combined in one device, reducing your investment cost and enabling you to multi-task from one machine.
- A secure user log-in ensures documents are only printed when users are at the device, eliminating unnecessary printing and wasted paper, which in turn saves you money. It also means that any confidential information is only viewed by the person who printed it.
- The device automatically reads and reports its own print counters to Canon so you don't have to. This saves time and ensures your invoices are always accurate.
- The device monitors the levels of toner and orders replacements before they run out. This saves you the time it takes to check it manually and saves cash flow because you never order more than you need.
- The device spots potential issues before they arise, making sure that it is ready when you need it, maximising uptime and saving you precious time and hassle.
- Smart software combines different file types into a single document, for onscreen previewing and immediate printing.
- The built-in scanner allows documents to be scanned directly to your inbox, or direct to others, for efficient, swift processes.
- The device converts paper into text searchable documents that can be sent to multiple locations simultaneously.
- Canon gives you the choice of 3 service packages to fit your individual needs. If uptime is important, we can offer a pack that guarantees 98% uptime and if cost is your biggest issue, we'll help you save.

How Canon can help you.
