

iW Publishing Manager Professional

Complete document creation and print management system

- Ideal for corporate, in-plant printing and print-for-pay applications
- Compile documents from a variety of sources
- Simple digital and hardcopy importation
- Advanced image editing features
- Supports imageRUNNER advanced finishing features

iW Publishing Manager Professional Edition is an easy-to-use software application that makes it simple to compile and print documents such as catalogues, brochures, manuals, proposals and reports.

Working in conjunction with Canon's imageRUNNER digital print production systems, Publishing Manager Pro ensures documents are produced to the best possible standard and with the utmost efficiency.

A more efficient print workflow

In essence, Publishing Manager Pro provides an efficient method for managing the complete print workflow from your workstation.

It enables you to compile information and images from a variety of hardcopy and electronic sources into cohesive and attractive documents, merge data if necessary, and then print them or prepare them for digital distribution, all from one easy-to-use interface.

Simple drag-and-drop importation

Digital information and images can be compiled from a wide variety of sources, including Word, Excel, PowerPoint and Adobe Acrobat. Simply drag and drop files from their original location into the Publishing Manager Pro window.

Alternatively, you can use the iW Document Writer feature to import a file directly into a new or existing Publishing Manager Pro document via the standard print menu of most applications. Once imported, information can be reordered as you choose.

Direct hardcopy importation

Even hardcopy information can be incorporated into a Publishing Manager Pro document using an imageRUNNER's Universal Send feature. With the press of a button, this feature scans and sends the hardcopy information to the Hot Folder feature on your workstation where it is converted into the appropriate format and then imported directly into the document of your choice.

Publishing Manager Pro also supports Network ScanGear. This imageRUNNER scanning tool enables you to import hardcopy information directly into Publishing Manager Pro using an imageRUNNER's scanning function.

Powerful image editing features

The powerful image editing features enables you to edit and improve scanned images before they are imported. It performs tasks such as tilt correction, page rotation, black frame and hole punch removal, de-speckling and de-skewing simply and easily.

Other time saving features such as batch image rotation and automatic import settings limit the need for manual intervention during the importation process.

iW Publishing Manager Professional

Compile complex documents easily

The easy-to-use interface makes it simple to add elements such as watermarks, chapter breaks, tab paper inserts and front and back covers, and then preview the document before printing.

Print settings can be previewed for quick proofing and saved within the document for true on-demand printing when it's required.

A wide variety of printing options

Publishing Manager supports all of imageRUNNER's advanced finishing features such as professional stapling and hole punching, Z-folding, automatic saddle-stitched booklet making, even single and double-sided printing in one document.

Print, export or store

Once a document has been compiled, it is equally simple to send it direct to print or prepare it for digital distribution. Documents can be saved and exported in PDF, TIFF, JPEG or BMP format.

What's more, you can team iW Publishing Manager with iW Document Manager software to create a convenient and immediate archiving system for print-ready documents.

Other features

- Hot folder print processing
- Document imposition feature
- Blank page recognition for chapter division

SOFTWARE REQUIREMENTS – OPERATING PLATFORM

Microsoft Windows 2000 Professional with SP4 or later

Microsoft Windows XP Home Edition with SP1 or later

Microsoft Windows XP Professional with SP1 or later

CANON PRINTER DRIVER

PCL 5e/5c Version 6.97

PCL 6 Version 4.97

UFR Version 1.40

UFRII Version 1.54

PS3 Version 2.74

SCANNER DRIVER

Network ScanGear V1.60

Colour Network ScanGear V1.40

RECOMMENDED ENVIRONMENT

PC: CPU Pentium IV 2GHz or faster

RAM: 512 MB or more

Disk Space: 10 GB HDD space or more

Display resolution: 1024 x 768

Colours: True colour (32 bit)

SUPPORTED CANON DEVICES – B&W

iR 400, iR 1600, iR 2000, iR 2010, iR 2016, iR 2020, iR 2200, iR 2220i, iR 2270, iR 2800, iR 2870, iR 3300, iR 3320, iR 3570, iR 4570, iR5000, iR5000i, iR 5020, iR 5020i, iR 6000, iR 6000i, iR 6020, iR 6020i, iR5570, iR 6570, iR 7200, iR 8070, iR 8500, iR 9070, iR105, iR105+, iR 7086, iR7095, iR 7105

SUPPORTED CANON DEVICES – COLOUR

iRC2570, iRC3100, iRC3170, iRC3200, iRC3220, iRC5800, iR C6800, iRC5870, iRC6870

DATABASE

The following data formats can be connected to for variable data input to iW Publishing Manager via corresponding ODBC driver:

Text File (extension .txt, .csv) (comma as separator)

Microsoft Excel 97, 2000, XP, 2003 (.xls)

Microsoft Access 97, 2000, XP, 2003 (.mdb)

Microsoft SQL Server 7.0, 2000

Oracle 7, 8, 8i, 9i
