

The Canon LEGRIA HFS11 digital video camera takes Full HD video recording to new heights. Combining several unique and highly-advanced imaging technology and 64GB of built-in flash memory, the LEGRIA HFS11 represents a true breakthrough in HD recording.

With its stunning design lines, the Dual Flash Memory LEGRIA HFS11 shoots to 64GB of internal flash memory, as well as to removable memory cards. Combining an 8.0 megapixel Full HD CMOS sensor, a genuine Canon HD Video Lens with a 10x optical zoom, and the new DIGIC DV III processor, image capture size is almost three times greater than Full HD resolution – providing the ultimate in image quality. With an extensive set of professional-level controls and features, the LEGRIA HF S11 is suited to high-end consumers or professional movie sets.

Powerful-Plus

Key Features

Revolutionary Flash Memory

- Durable and reliable video camera that is vibration / shake resistant in compact design
- Flexible options to increase memory space
