

2020 COPIER LINE OF THE YEAR AWARD

imageRUNNER ADVANCE WINS FOUR OUT OF THE LAST FIVE YEARS!

BLI is the world’s leading independent provider of analytical information and services to the digital imaging and document management industry.

The award is based on a rigorous series of lab tests—with a heavy emphasis on durability—that takes about two months to complete.

“Only three misfeeds in 2,115,000 impressions on Canon’s current copier MFPs. That’s a rate of 1 jam per 705,000 pages, which is simply astounding.”

George Mikolay, Associate Director of Copier MFP/Production Analysis, Keypoint Intelligence

SECURITY FEATURES RATING
for all tested third generation models
